# Photo Editing Prompt for Chatgpt

1. **Prompt**: Use the original reference photo as the ONLY identity reference. Preserve the exact face, natural appearance and identity 100% unchanged. Ultra-realistic 4:5 cinematic portrait of the man standing on an old stone tower, arms slightly open as strong wind moves his clothing, staring upward toward the storm. Outfit: dark navy leather jacket, oversized grey scarf, black cargo pants and heavy boots. A massive flock of ravens circles beneath dramatic lightning-filled clouds. Flying feathers, rain mist and distant mountains create depth. Blue-silver cinematic grading, cold highlights, soft lightning rim light, deep contrast, realistic textures, 8K DSLR, gothic fantasy atmosphere.

   **Demo**:

2. **Prompt**: Use the reference photo and keep my face completely unchanged. Dramatic cinematic portrait against black, standing in profile with one hand extended forward as a glowing crimson-red butterfly hovers above my palm. Outfit: oversized cream textured sweater. Red and subtle blue rim lights outlining hair and shoulders, floating sparks, atmospheric haze, deep shadows, cinematic crimson-blue grading, shallow DOF, photorealistic DSLR, HDR, 8K, 4:5.

   **Demo**:

3. **Prompt**: High-contrast monochrome
   Double-exposure portrait in vertical orientation, tight side profile of a young man facing right with crisp facial contours and soft rim light on nose and lips, his head and hair seamlessly blended into a dense stand of tall, leafless pine trees and a distant modern city skyline rising from the crown of his head, long vertical ink-drip streaks and paint smudges cascading down to merge portrait and landscape, stark white negative background, deep shadows and cinematic lighting, heavy film grain and subtle paper texture, ink-wash and photomontage aesthetic, melancholic and contemplative mood, atmospheric mist and soft glow threading between trees and skyscrapers, emphasize fine detail in eyelashes, stubble, tree bark, and architectural silhouettes, dramatic high contrast, moody grayscale, vertical motion and texture, high resolution, finely layered digital painting/photographic composite feel, vertical 4:5 aspect ratio.

   **Demo**:

4. **Prompt**: Use the uploaded reference photo and preserve the exact face, hairstyle and identity. Create an ultra-realistic 8K HDR cinematic portrait of the man kneeling on one knee, looking upward with a calm, powerful expression. Outfit: dark beige oversized shirt, cream wide-leg pants and white sneakers.

   A glowing divine blue hand descends from above holding a wooden flute with Rudraksha beads, red fabric wraps and a peacock feather. Long crimson ribbons twist around the man and flute like flowing energy. Low-angle cinematic composition, dramatic blue-gold light, volumetric fog, realistic textures, 4:5.

   **Demo**:

5. **Prompt**: Use the uploaded image as the ONLY identity reference and preserve my exact face, hairstyle, skin tone and identity.

   Create a hyper-realistic 4:5 cinematic rainy-night scene. I walk beside a same-height glowing white chalk girl, wearing a black leather jacket, dark T-shirt, charcoal pants and sneakers. I hold a transparent umbrella while looking toward her with a subtle smile. She carries a small bouquet of red roses and has a pink flower in her long hair.

   Wet road reflections, streetlights, mist and visible raindrops, cool blue-purple color grading, realistic shadows, shallow DOF, seamless sketch integration, cinematic DSLR photography, 8K, no text.

   **Demo**:
